

## Mahindra rolls out Krish-e Centres in Maharashtra

- *Krish-e - Mahindra's new 'Farming as a Service' (FaaS) business kicks off a digital era in Indian agriculture*
- *Krish-e will offer farmers a wide variety of technology driven services customised to crops and stages in the crop cycle*
- *Leveraging the power of agronomy, mechanisation and digitisation, Krish-e will improve farmers' income per acre*
- *Roll out of the first set of Krish-e centres in Maharashtra to offer agronomy, equipment rental and digitisation services, supported by three farmer facing apps – Krish-e, Krish-e Rental and Krish-e Nidaan*

**Mumbai, October 02, 2020:** Mahindra & Mahindra Ltd.'s Farm Equipment Sector (FES), a part of the USD 19.4 billion Mahindra Group, today rolled out Krish-e Centres in Maharashtra as part of Mahindra's new Farming as a Service business.

Carrying the tag line – **'Expert Takneek. Naye Upay. Parinaam Dikhaye'** – Krish-e is a business vertical that provides technology driven services that are progressive, affordable and accessible to farmers. Krish-e aims to increase farmer income through digitally enabled services, across the complete crop cycle. These include agronomy advisory, access to advanced farm equipment rentals and new-age precision farming solutions, all focused on bringing down overall costs and improving crop output and thereby farmer's income.

Today, the Mahindra Group celebrates its 75<sup>th</sup> anniversary. The Mahindra group began its journey in Maharashtra, and it is fitting that Krish-e opens its first centres in Aurangabad and Baramati in the same state, to be followed by 6 other locations across Maharashtra in Jalna, Wardha, Nanded, Pune, Daund and Solapur. Krish-e centres will soon roll-out across various states in a phased manner. Krish-e has an omni channel approach where the farmer can avail personalised services on their fields, at Krish-e centres, via the Krish-e suite of digital apps and through the call centre to reach our Krish-e Sahayaks.

**Commenting on the launch, Hemant Sikka – President, Farm Equipment Sector (FES), M&M Ltd. said.** "Although investments and technological innovations in agriculture have improved output levels in India, productivity levels and farm incomes have great scope for further improvement. At Mahindra, we want to do our bit and make a difference in the way farming is done. With increase in farmer's income as the core focus, our vision is to provide technology access to farmers at competitive costs and thereby enable them to RISE!"

**Mr. Sikka further added** "We are happy that Krish-e is rolling out its first set of centres on the 75<sup>th</sup> anniversary of the Mahindra Group. Krish-e is an innovative new business vertical conceived with the idea of ushering in a new digital age of farming in India. It aims to transform the lives of farmers, by helping them adopt better farming techniques powered by AI, IoT and digital solutions that are affordable and accessible, paving the way for increased productivity and profitability. Through Krish-e, we at Mahindra are engaging with our farmers more deeply and creating stronger relationships."

**Ramesh Ramachandran – Senior Vice President, FES Strategy & FaaS, M&M Ltd., said,** "Krish-e is already making a difference to farming outcomes through its services which

amalgamate agronomy, mechanisation and digitisation. Through Krish-e, we have already impacted over 1 lakh farmers, with solutions tailored to demonstrate impact on cultivation costs, crop health and productivity. Krish-e currently has approximately 1,000 demo plots, where we work alongside farmers to showcase visible impact through a combination of agronomy inputs and advanced mechanisation solutions. Through Krish-e, we are working to create a nation of Champion Farmers.”

### **Kicking off a Digital Era in Farming**

Krish-e will leverage the Internet of Things (IoT) and Artificial Intelligence (AI) to benefit the farming ecosystem and bring the power of precision farming to farmers, affordably and accessibly. To enable this, M&M has made strategic investments across the globe including Resson – a Canadian predictive analytics company, Gamaya – a Swiss hyperspectral image analytics company and Carnot – an Indian AI enabled agri IoT company.

Krish-e Precision Farming solutions use a variety of sensors and cameras on the farm, on drones, on satellites and on farm equipment to collect soil, crop and machine data. AI algorithms transform this data into user friendly and insight rich field maps enabling farmers and agronomists to run variable rate farm operations using intelligent machines. Such operations are already helping potato farmers, grape farmers and sugarcane farmers reduce their cost of cultivation and improve their yield.

Krish-e has launched three apps to deliver advisory and rental services in a differentiated and farmer focused manner. Advisory services are crop specific and include a customised and dynamic crop calendar and real time diagnosis and resolution of pest & diseases.

The rental app leverages an AI powered IoT kit that tracks equipment and work performed. Targeted at rental entrepreneurs with a fleet of equipment, the kit is plug and play, intuitive to use and extremely affordable. Already used by almost 2,000 rental entrepreneurs, the kit increases the efficiency and profitability of rental operations.

These three apps are available as ***Krish-e, Krish-e Rental and Krish-e Nidaan*** to download from the Google Play store.

### **About Mahindra**
